Harvey Morginstin called me yesterday to ask EPA to require the CPG to dredge the Nutley boat ramp, as part of RM10.9. I explained to him that we were unlikely to do that, because we make decisions based on risk. He would like to talk to someone in the CPG to appeal for that dredging to be done, since you are so close, Nutley dredging is only 200 cy, etc....

I said that I would find out who in the CPG he can talk to. May I give him your name (sorry) ?

P.S. He is putting slides together for his talk at the Passaic River Symposium and wanted to add something about this. I was very clear with him that EPA would not be ordering CPG to do this. You may want to talk to him fairly soon to prevent him from saying something rash at the Symposium (or at least do what you can).
